

Meriam Ghrissi

Software Engineering Student

PROFILE

As a passionate computer science student, I always strive to expand my knowledge and acquire new skills in this ever-changing field. My academic background and my experiences are not rich enough but they have allowed me to develop my ability to solve problems through algorithmic reasoning and the resolution of problems that I encountered with the Enactus FSM team in our projects. I also learned to work in a team and communicate my ideas clearly. I am convinced that my passion, determination and skills will allow me to contribute significantly to any project or team I engage in and I am always ready to learn and take on new challenges.
